# It's funny how when something's"in" quality often disappears.

Nowhere is this more evident than in the quality of today's leans. For since they've become the race. The outraceous has hannened There's been a shift of emphasis from producing first class leans to producing

leans fast. In bulk, it seems there are many who coast along knowing leans just passable are still going to sell.

It's this kind of smugness Big Smith takes exception to. Because we started making leans over 60 years and, when leans were meant to last. Something we haven't forgotten That's why we fashion our leans with only the finest denim. And construct

our leans with a strength and a fit second to none. We begin with the seams. Every one is stitched, 10 stitches to the inch, with

a unique thread nearly four times as sturdy as ordinary thread. Next, we build up all the areas that tend to let you down. We double stitch the voke, the packet, and the inside of the

leas. Reinforce pocket tops and belt loops. And use only heavy weight brass zippers for the greatest resistance to stross To assure you an excellent tit, we press every lean

packet to iron out any shape distortion We put this much work into all our leans, yet, surprisingly we take less from your wallet than the majority

of our competitors do. By now you might be starting to think that our years

are a baroain in more ways than one. And so they are. Because making leans that just make it will never be enough for us.
